 - Software documentation
 - Standard operating procedures
- Programming languages
 - Visual Basic
 - C#
 - Transact-SQL
 - Javascript
 - CA-Visual Objects
- GIS implementation & management
- Website development
- Creating and teaching workshops
- Customer relationship building
- Sales & marketing
- Software systems
 - MS Visual Studio 2008
 - SQL Server 2008
 - ESRI – ArcGIS 9.3
 - Google Maps API
 - Crystal Reports 2008
 - SAP Xcelcius 2008
 - Photoshop CS3
 - Photodex Proshow Producer

CAREER ACHIEVEMENTS

2009-2011

TransTrack Systems

Serving as Senior Associate, my duties include customer training, technical support, system and data dictionary documentation, report (RPT) writing, MS-SQL stored procedure development and Xcelcius dashboard development. During my time with TransTrack, I acquired important knowledge of developing and managing a fully functional data warehouse, developing business intelligence concepts, as well as gaining experience in the public transit industry.

Reason for leaving: no new revenue-generating work occurring in foreseeable future

2000-2009

Trapeze Software Group, Inc.

As Product Manager and Software Developer, duties included designing, overseeing and managing all programming activity related to the former AMS software products (administration software suite for school transportation) and former EPS (an ESRI business partner) products including a bus routing system based on ESRI's GIS technology. These duties included fulfilling technical support on AMS & EPS products, performing on-site training, and assisting in the presentation of all products for marketing purposes. Also managed and supported 300+ software installation sites. Gained extensive knowledge of ESRI's ArcGIS technology, programming with ASP.NET version 3.5 and began utilizing the Google Maps API framework. While at Trapeze, I also gained knowledge the public transit industry.

Reason for leaving: position was eliminated due to the weakening economy

1990-2000**Administrative Management Systems (AMS)**

Co-founder of AMS, a software development company that addressed the needs of public school administration. As Director of Software Development, duties included designing, overseeing and managing all programming activity performed by AMS, fulfilling technical support on AMS products, doing on-site training of new clients, and assisting in the presentation of products for marketing purposes. The company's main focus was addressing school transportation, school facility maintenance and special-needs student record management. AMS grew to a company of 8 employees.

Reason for leaving: AMS was acquired by Trapeze Software Group

1987-1990**Construction Software Productions**

Sole proprietor of a business supplying a line of custom software packages and computer consulting to local businesses. The software packages developed focused on the construction and transportation industries. During this time, more than 150 clients were installed with either packaged or custom developed software from this business.

Reason for leaving: To start new business - AMS

1986-1987**Swanson Graham & Russo Accountants**

Helped the clients of this CPA firm to implement various software and accounting systems. Also performed in-house duties such as maintaining computer systems and fine-tuning accounting models for clients.

Reason for leaving: To start individual business

PERSONAL ACCOMPLISHMENTS

- Since 1983, have developed, written and deployed many custom software applications for individual businesses as well as industry-specific or "vertical" applications.
- Built and managed several software businesses from the ground up.
- Served on a Board of Directors for a small community of 12,000 people for five years and served as Board President for one year.
- With my wife, completed a series of comprehensive electronic virtual tour guides of Mojave Desert regions, currently sold by National Parks and area museums.

EDUCATION

1988 - Current

Ongoing education on GIS technologies from ESRI, Xcelcius dashboard development and products from Microsoft and Computer Associates.

1980 - 1983

College studies in Computer Sciences and Mechanical Engineering. Didn't complete college due to poor computer science curriculum during these years and expanding business opportunities.

PERSONAL INTERESTS

- Travel – local, domestic and international
- Writing and development of "virtual tour guides" – see www.backroadswest.com
- Photography
